

Emergency Communication Remote

Features

- 3.5" black button with white "PUSH FOR HELP"
- 16 gauge steel housing with liftaway hinge door
- Single polarized plug in connector for simple cover assembly installation
- Back box features separate terminal strip for site wiring
- White LED identifies when Remote is acknowledged by Master Command Panel; orange LED signals when remote is activated; green LED indicated power
- Integrated 2 watt mylar cone speaker with vandal resistant grille
- Slide-in label window for remote location identification

Specifications

16 gauge steel enclosure shall be semi-flush or surface mounted. All electronics will be installed on liftaway hinge door, allowing for efficient installation. Highly visible 3.5" black button shall display white "PUSH FOR HELP" text. Bright white LED will clearly identify when the Remote is being acknowledged by Master Command Panel. Orange LED and audible tone shall signal when the Remote has been activated. All Remotes will be addressable and supervised with trouble indicated at Master Command Panel. Integrated 2 watt mylar cone speaker shall have vandal resistant grille. High barrier terminal strip will be mounted in back box for site wiring. Knockouts shall be included on top and bottom of enclosure.
